Instruct a Utility University course!

Education plays an important role in how conference delegates adapt to the constant changes that occur in the industry. To meet this need, DistribuTECH offers pre-conference Utility University Courses. These courses are issue-concentrated, practical classes that feature the hottest topics in the industry taught by experts in their respective fields. If you have a topic that you would like to propose to instruct as a course, please visit www.distributech.com and click on Submit a Utility University Proposal. Applications are due by August 3, 2009.
